Comprehensive Range of Products
and Services

For all your Horse and Rider Needs

TopSpec Feeds

www.topspec.com

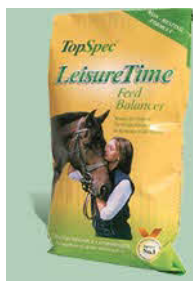

TopSpec products are highly respected throughout the equine industry for their nutritional integrity. They have been used successfully by thousands of horse owners to improve the performance, condition and relaxation of their horses and ponies.

Whilst TopSpec Comprehensive Feed Balancer is still the best and simplest way to feed a whole yard of horses the same product, there are possible alternatives for individual horses.

This is why TopSpec LeisureTime Feed Balancer was launched in 2006 and this autumn (2008), we are launching TopSpec Lite, a feed balancer for good-doers in light to medium work.

TopSpec FibrePlus Cubes are an excellent highly digestible fibre source with added ingredients to promote muscle development and function. They can be fed damp or quick-soaked. Damped they are ideal for Good-Doers because they have a DE of only 9MJ/kg and soaked they are a perfect hay replacer for elderly horses and ponies. Non-heating.

TopSpec LeisureTime Feed Balancer is a palatable, pelleted product designed specifically for horses and ponies kept for leisure and in light to medium work. It contains a broad-spectrum supplement and a pure, protected yeast combined with a feed designed to promote muscle development and function.

TopSpec Lite Feed Balancer is a palatable, pelleted product designed for good-doers in light to medium work. It combines a broad-spectrum supplement and a hoof supplement with a high-fibre, exceptionally low calorie feed.

TopSpec Comprehensive Feed Balancer is a palatable, pelleted product. It is a very flexible, nutrient-rich feed designed to balance the rations of most horses and ponies simply by adjusting the rate at which it is fed and the products it is fed with . It contains several supplements combined with a feed designed to promote muscle development and function. A broad-spectrum supplement is backed up by others including a superb hoof supplement, generous levels of anti-oxidants and sophisticated digestive aids

TopSpec Senior Feed Balancer is a palatable, pelleted product designed for elderly horses. It is the first and only feed balancer to include the scientifically recommended rate of glucosamine to help maintain mobility. It combines the benefits of a joint supplement with a veteran-specific feed balancer.

TopSpec Stud Feed Balancer is a palatable, pelleted product designed for broodmares, youngstock and stallions. It contains several supplements combined with a feed designed to promote muscle development and function. A broad-spectrum supplement is backed up by others including a superb hoof supplement, generous levels of anti-oxidants and sophisticated digestive aids.

TopSpec Super Conditioning Flakes represent a breakthrough in equine nutrition. This cooked muesli is 25% more conditioning than traditional mixes and cubes because it is highly concentrated with a conditioning index of 16MJ/kg as fed. Although it is full of naturally oil-rich ingredients it is very palatable

TopSpec CoolCondition Cubes are completely free of all cereal grains. They have a good conditioning index of 12.5MJ/kg as fed, yet are 'non-heating' allowing horses to look good but focus on the job in hand.

TopSpec AntiLam is a palatable, pelleted product specifically designed to provide nutritional support for those susceptible to, being treated for, and recovering from, laminitis. It contains a range of highly-effective supplements pelleted onto a high-fibre, very low-calorie base.

TopSpec Doctor Green is a powdered additive with a fabulous flavour. It contains highly effective ingredients designed to stimulate appetite in horses. It is particularly effective for horses that are working hard, on high concentrate diets or are stressed.

TopSpec Healthy Hoof (No.1) is designed to be fed to horses and ponies with poor hoof quality. It is a combination supplement containing an excellent hoof supplement plus a broad-spectrum supplement for horses in light to medium work.

TopSpec General Purpose (No.2) is a broad-spectrum supplement designed to be fed to horses and ponies in light work.

TopSpec Broodmare & Youngstock (No.3) is a broad-spectrum supplement designed to be fed to broodmares, stallions, and youngstock.

TopSpec Calmer is a powdered additive designed to be fed to horses and ponies with anxious temperaments, particularly those that cannot cope with stressful situations. It is a palatable, apple-flavoured product designed to be mixed into any feed daily.

TopSpec 10:10 Joint Support is a granular additive, which provides a nutritional support system to promote the comfort zone in and around joints.

TopSpec Comprehensive is the supplement we put into TopSpec Comprehensive Feed Balancer. It is the most fully comprehensive supplement you can buy and it can successfully be fed to every horse or pony on your yard. A broad-spectrum supplement is backed up by many others including a superb hoof supplement, generous levels of anti-oxidants and sophisticated digestive aids.
